

RE10x10

《CLIMATE DECLARATION》

Declares that our corporation is committed to use electricity generated from renewable energy with at least 10% by 2025.

The Intergovernmental Panel on Climate Change (IPCC) of the United Nations calls for the global temperature rise to be kept within 1.5°C this century. Businesses worldwide are taking decisive climate action. As a part of Taiwan's business community, we acknowledge the critical juncture of climate change and commit to making tangible changes to address the climate crisis, starting now!

Adopting renewable energy is the key to reducing carbon emissions. Greenpeace Foundation's pledge aims to assist and enable the RE10x10 companies in making substantive preparations to purchase renewable energy, regardless of their size. Starting from the year they join us, our goal is for these businesses to plan, procure, or use renewable energy for the first time. We aim for at least 10% of the total electricity consumption to come from renewable energy by 2025. We are also committed to progressing towards a 100% renewable energy goal by 2050.

Company name:

Kwantex Research INC.

*If your company plans to carry out more proactive actions on mitigating climate change (ex. You're aiming to be 100% powered by renewable electricity by 2050), please specify below:
